

Operating rooms validation

What

We are specialised in inspections and surveys to validate the cleanliness conditions of operating rooms.

Why

Controls in operating rooms are regulated by ISPESL guidelines (2009 edition) and by several specific technical standards applicable to different risk factors.

Who

Owners and employers of private and public medical centres with operating rooms, are required to carry out regular checks and surveys.

Experiences

Veram experts gained 15 years of experience in surveys in operating rooms. Since 2009 the activity increased and actually it includes hundreds of hospital wards countrywide.
