

ISO Classification for clean rooms

What

We are specialised in surveys to calculate the ISO classification of clean rooms and contamination controlled areas.

Why

ISO classification of clean rooms are regulated by ISO Standard 14644-1 according to how much particulate of specific sizes exist per cubic meter.

Who

Builders, owners and employers of private and public medical centres with clean rooms, are required to carry out regular checks and surveys.

Experience

Veram carry out surveys to calculate the ISO classification of clean rooms and contamination controlled areas through its calibrated particle counters, in accordance with international technical standards.
